

## GigabitNow To Bring Fast Gigabit Fiber Internet To Placentia, California

### GigabitNow Continues Expansion Into Southern California Bringing Gigabit Connectivity To Residents And Businesses of Placentia, California

(Seattle, WA – June 1st, 2021) — GigabitNow, a division of IsoFusion, a leading provider of Internet access and IT services on the west coast of the United States, announced today the expansion of Gigabit Fiber Internet services into the city of Placentia, California.

GigabitNow will deliver Gigabit Internet services via an exclusive partnership with fiber-optic network developer SiFi Networks, which will be constructing the citywide fiber network, passing every home and business in the city. The network will allow for fast, reliable Gigabit Fiber Internet connectivity without bandwidth caps, buffering, or privacy concerns to every Placentia residence and business.

“Everyone at GigabitNow is looking forward to expanding our fast Gigabit fiber Internet service to the city of Placentia,” said Stephen Milton, CEO of GigabitNow. “GigabitNow’s fiber Internet services surpass anything being offered in the city today and is designed to meet the Internet demands of residents and businesses today with scalability well into the future.”

GigabitNow is excited to bring 100% Gigabit fiber Internet services to the community of Placentia, California. Like GigabitNow’s other established Gigabit fiber networks across the west coast and the northeast United States, GigabitNow will deliver fast symmetrical speeds, unlimited data usage, the most advanced Wi-Fi available and 24/7 live customer support, all without long-term contracts or hidden fees. Businesses will benefit from secure fiber Internet reliability and an extensive range of connectivity options, telephone, data center, and cloud solutions that GigabitNow’s parent organization, IsoFusion, has been delivering to businesses across the country for 30 years.

“I am very pleased to be expanding our relationship with GigabitNow into yet another FiberCity project,” said Ben Bawtree-Jobson CEO SiFi Networks. “Our partnership with GigabitNow has now expanded to both U.S. coasts, and we look forward to getting network construction started so that GigabitNow can provide the city of Salem with the best Internet experience available.”

The need for Internet connectivity that is just as fast for uploads as it is for download traffic has become essential to maintain quality video calls, online interactions, and concurrent users online. GigabitNow’s upload and download speeds are the same, ensuring your experience is great regardless of how

you are using your Internet connection. Learning, Working, Streaming, and Playing online without slowdowns has become integral to our everyday lives, and GigabitNow will make it easy for the Placentia community.

GigabitNow fiber Internet allows for multiple users and devices to access fast Internet speed at the same time without any special setup or additional cost. Something very important to everyone in today’s world with expanded telecommuting, remote learning, and streaming video entertainment consuming more and more of our Internet connections.

With this expansion into Placentia, GigabitNow adds another community fiber network to its growing list of communities in Washington, California, and Massachusetts, served by Gigabit Fiber Internet, surpassing Internet speeds and reliability of incumbent providers. SiFi Networks’ construction in Placentia is set to begin June 2021, with service installations to residents and businesses starting January 2022.

Residents and businesses can pre-register for service starting today at [gigabitnow.com/placentia](http://gigabitnow.com/placentia)
